

## DIY Planer Releases

Chuck Jones

With the price of commercial Planer board releases, Here is a VERY effective Do It Yourself version!

What I do is use clothes pins & shower curtain hooks for Planer Board Releases . I take some plastic tube ( that I buy from the dollar store cheap. It really is a cheap jump rope and comes in bright orange or lime green. THIS REALLY ADDS TO READING THEM.) I take it apart & cut into small sections & slide over and cover the shower curtain hook & that improves the "vision" of the releases and makes them easier to see with "old" eyes!
